

## Mix & Match

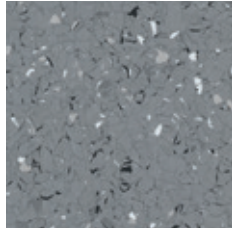

El pavimento tiene que ser muy versátil: tiene que ser conductivo en quirófanos o laboratorios, capaz de absorber el sonido en pasillos y ser antideslizante en instalaciones sanitarias y comerciales. Con Mix & Match, DLW Flooring ha desarrollado un sistema modular ingenioso y versátil que incluye pavimentos vinílicos homogéneos en distintos tonos disponibles también con distintos requisitos técnicos especiales. Este sistema se completa con Favorite PUR+ y la función higiénica Sanitized®. Este producto cuenta con efectos antimicrobianos únicos. Con esta herramienta tan completa es posible utilizar el mismo diseño de pavimento en todo un edificio, incluso en aquellas zonas del edificio que cuentan con requisitos técnicos especiales.
